d lose his re-election bid to Karen Weaver. Weaver has stated that the health consequences will lead to a grea

lems. "It must be a larger study and it must be more extensive, Litherland said. It was a small sample. More res

ter need for services in special education, mental health, and juvenile justice. GovernorSnyder apologized to th

earch needs to be done." James Montgomery, an environmental science professor at DePaul University, says

e citizens of Flintand then sent \$28 million to the city for supplies, medical care, and infrastructure upgrades. A

Chicago ought to do a better job warning people about street work affecting their water, per the EPA'S study

number of class action lawsuits from the local to state level were filed. Investigations were opened by the United

. "If you dont believe the results, then why dont you commission your own independent scientific study?" Montg

States Attorneys Office forthe Eastern District of Michigan and theMichigan Attorney Generals office. The Virg

omery said. For its part, the EPA said the construction findings were incidental and not the core reason for t

inia Tech team of engineersand scientists not only concluded thatFlints water had serious lead contamination, b

he study. And it suggested the study didn't show for sure that physically disturbing a lead service line caused h

ut also had bacterial problems, such as Legionella. After the watersource switch, there was a spike in cases of L

igher lead levels in the homes where samples were taken. "The U.S. EPA did not conduct sampling before a

egionnaires disease and 10 resulting deaths, with Edwards hypothesizing the problems could have been create

nd after the physical disturbances to the lead service lines at the homes that were sampled," an agency spokes

d from the River water source, lack of corrosion control, and large buildings. Over his career, Edwards has sp

man said, "so although we observed that the homes where the lead service line had been physically disturbed g

ecialized in problems that occur in consumers home plumbing, including leaks in plastic and metal plumbing sy

enerally had the highest lead levels, we. did not collect sampling data from prior to the disturbances to make a c

stems, hot waterheater design, opportunistic pathogens, and lead in water. Hes also worked withwater utilities o

omparison between the pre- and post-disturbance lead levels." Cities not only have to find homes with lead s

n problems in the main distribution systems from concrete to iron corrosion to arsenic treatment. When water c

ervice lines, they have to tell people how to collect water samples- and filling up a water bottle can be surprisin

onditions require it, water utilities also add lime or orthophosphates as a further barrier to prevent lead from get

gly controversial. As a result of the national attention on FLINT, the state of New Jersey took a second look a

ting into drinking water. When water chemistry is carefully controlled, it prevents dangerous levels of lead from e

t its sampling methods and last month told cities to make some changes. "For probably going back more than 1

ntering the drinking water system from the pipes. The historical context for what happened in FLINT also is o

0 years they've been handing out an instruction sheet that tells people the wrong instructions, to take the aerato

outlined in the book *The Great Lead Water Pipe Disaster* by Werner Troesken, which examines the public health i

r off," Newark city spokesman Frank Baraff said. An aerator is a little screen on the end of a faucet. Until now, N

mplications from 150 years of lead pipes in local watersystems, points out Edwards. He demonstrates not only

ewark's instructions to residents taking water samples told them to "remove the aerator screen from the nozzle

in the US, but also in Europe how people would drink water from these pipes, got deathly sick, and figured out t

of the spigot pipe." The EPA recommended that public water systems stop asking people to remove aerat

hat lead pipes were the problem, he adds. There would be a lot of information in the newspaper and someone w

ors prior to sampling in 2006, when a lead poisoning scare in Durham, North Carolina raised questions. about t

ould think about can we sue the government to fix this. You cantits sovereign immunity. Then the problemgets f

he city's sampling methods. "Removal and cleaning of the aerator is advisable on a regular basis," the EPA m

orgotten and goes through a cycleover and over again. What happened in FLINT has the potential to happe

emo at the time said. "However, if customers are only encouraged to remove and clean aerators prior to drawin

n elsewhere in the US, points out Edwards. Many older US cities, including Washington DC, Philadelphia, New

g a sample to test for lead, the public water system could fail to identify the typically available contribution of lea

Orleans, and Detroit, have lead pipes in their water distribution system or lead-bearing plumbing inside homes,

d from that tap, and thus fail to take additional actions needed to reduce exposure to lead in drinking. water." A

point out Virginia Tech researchers. Flint's crisis comes as EPA prepares to revise the Lead and Copper rule

s for Newark's water, Baraff said 90 percent of samples had less than 10 parts per billion lead in 2015. Because

,with the proposal likely final in 2017,according to the AWWA. The association reports EPAs National DrinkingW

e Newark hasn't experienced high lead levels in several rounds of lead testing, the city is only required to test f

ater Advisory Council has already recommended that revisions include a mandate that all systems implement a s

or lead every three years in just 50 homes, instead of annually in 100 homes. Bob Considine, a spokesman fo

strategic plan for the complete removal of lead service lines with responsibility for replacement shared between t

r the New Jersey Department of Environmental Protection, said the state might move to require testing more fre

heutility and its customers. The damage to Flints children isirreversible, points out Edwards, adding that with im

quently than what the Lead and Copper Rule requires. "It is something we are very strongly considering," Cons

proved nutrition and care,you can ameliorate the harm of leadexposure. The damage to the citys pipesalso is s

idine said in an email. Newark's about face on aerators stands in stark contrast to what's been going on in Phil

significant and Edwards says it will take millions of dollars for the city and residents to replace Flint's drinking water

adelphia, where the city insists there's nothing wrong with telling people to remove the little screens on their fau

er infrastructure. Yet residents have among the highest water bills in the country a bill can run as high as \$175 a

cets prior to collecting water samples, despite intense criticism from Lambrinidou and others. The science is no

month, says Edwards. That's against the backdrop of homes selling for \$10,000, if they're selling at all. Accord

t there to support aerators being on or off to make a difference in Philadelphia," Burlingame, of Philadelphias w

ing to www.realtor.com , the median listing pricefor a home in earlier this year was \$30,950. Market trends sho

ater department, said. Aerator on versus aerator off, sampling with your left hand versus your right hand, is not

w home sales plummeting in the last year. While some residents have left, others cannot afford to. That leaves

going to make a difference about whether we are meeting the action level or not. Quigley, the head of the Pe

the residents who remain having to help foot the bill for mitigating a problem they did not create, points out Edwa

nnsylvania Department of Environmental Protection, suggested the merits of aerator removal are beside the po

rds. Some back of the envelope calculations suggest that waterbills will have to increase by about 30% to keep u

int- the 2006 recommendation isn't part of the Lead and Copper Rule, so it doesn't matter whether its sound ad

p mitigating pipe failures that are going to occur, says Edwards. Not only were they paying the highest rate in th

vice or not. Never mind that the rule itself wasn't good enough to prevent the FLINT water crisis in the first pl

e country, a lot of people couldnt drink it or bathe in it without getting rashes or complaining of other problems an

ace. "We do not enforce recommendations. They're not law," Quigley said.

d they had to buy bottled water to drink and bathe in, he says. The state owns that problem because the city and

its residents had no. say in thisdecision to not use corrosion control. Even though the mayor was votedout of o

ffice and the utility directorresigned, these people had nothing to do with this problem, says Edwards.From my p

erspective, the only thing they could be criticized for is that they trusted EPA and the MDEQ too much, he sa

ys. Why wouldnt you trust them?Its their job to do the right thing andprotect Flints children. There is noobvious p

rofit motive for them to poison kids. But thats what happened. Edwards concedes that at times, the story of the F

LINT water crisis has been in some ways, unbelievable. For more information visit: www.flintwaterstudy.org. T
